Emblemmarket Member

Discover the new way to buy promotional products and business gifts that frees you from minimum quantities and long production times.

- Before:
- High setup costs...
 - High minimum quantities...
 - Long production times...
 - Overpriced products...

After:

- No minimum quantities. You can buy only one if you want !
- You can order any combination of products and finishes !
- Once a member, there are no future setup charges !
- Your order ships in 48 hours !
- High quality products !
- Economical prices !

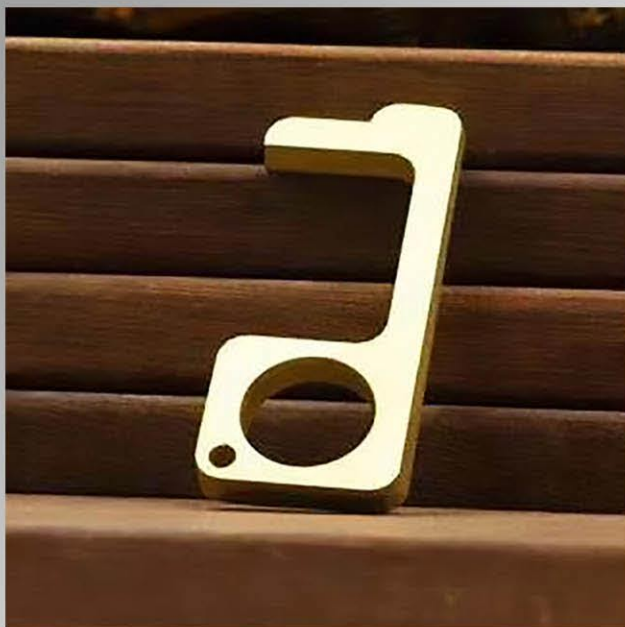

Join Emblemmarket Member !
Initial one time fee: 95 euros. Includes mold and 100 medallions (5 cm - 2" size), with up to 4 colors.
Finishes: antique brass or antique nickel.

In order to join Emblemmarket Member:

- 1 - Send us your logo and specify any additional text you want to add to your 5 cm (2") medallion.
- 2 - In a couple of days we will send you a full color simulation of your medallion in the two available finishes.
- 3 - Once you approve the simulation and choose your finish, we will proceed with the construction of the mold and the production of your 100 medallions. At this time, we will invoice you for the initial one time fee of 95 euros.
- 4 - We will notify you when your medallions are finished and in stock. This process has a total duration of 30 days from approval.

From this point onwards, you can order the products you want, when you want them and without minimums. We will also replace your medallions as you use them so they will always be ready for you when you need them.

KT-M2	38 mm	1,10	1,00	0,95	0,90	0,85	0,80	0,75

Sculpted and engraved in steel molds in 1979 by the Spanish artist Alfredo Lorente Ruiz (first place in the academy of Bellas Artes in Madrid) and one of the best engravers of the 20th century, the Newport Mint medals collection has been awarded numerous awards in the United States through the years. Today it is considered one of the best collections of medals in the world for both its quality and its history. We offer them in the 54 events shown in the following pages, in sizes of 64 mm, 38 mm and also as key tags.

Neck ribbons: see page 38.

Standard packaging: individual polybag. Optional packaging: see page 47.

Standard finishes: antique brass "gold", antique nickel "silver" and antique copper "bronze". Key tag finish: antique brass.

Production time: 3 days.

Coating: Clear Crystal Dome included in price.

Presentation: in sheets of 30 cm x 21 cm.

Standard shipping: 5,00 euros.

Production time: 5 days.

Glossary

Crystal Dome:	A brilliant and transparent dome of polyurethane that we apply on digital printed products to protect them and to give them a 3D effect that enhances the logo or image.
Emblemarket Member:	Special service for which a customer pays a one time fee of 95 euros, that entitles him/her to buy gifts and other products without minimum quantities and 24 to 48 hour shipping time. See page 3.
Emblem:	Metal reproduction of the detail and colors of a logo. Emblems are attached to accessories to serve a variety of functions. Example: a pin is an emblem with a soldered nail and a military clutch attached.
Insignia:	It is usually an emblem, made of metal for a general or specific authority. Example: the personnel of the armed forces or the police use insignia on their uniforms.
Bling:	Emblems with crystal stones included in their designs. The stones are offered in various colors and sizes. They are generally used as brooches, charms or pins.
Enamel:	Material used to add color to emblems, medals and other products. We offer two kinds of enamel: paint or epoxy resin. Both are offered in many colors. Paint enamel is applied to the sides and bottom of the cavities of an emblem, allowing the user to see and feel the relief of the walls. Resin fills the cavities completely, thus leaving a smooth surface on the emblem.
New Generation:	Name we give to emblems that have been enamelled with resin and polished by hand, in order to leave the surface perfectly smooth, polished and brilliant. "New Generation" is our top of the line in pins.
Glitter:	Small metal particles that reflect light, which are deposited by hand with tweezers and float on the surface of the resin while it is still in a liquid state. Once hardened, the resin traps the Glitter particles permanently, allowing the product to reflect intense lights and colors. There are many Glitter colors available.
Insert holders:	Medal with a smooth central area, where an insert is attached. We offer seven different holders as well as hundreds of inserts in metallic tones as well as full color. We offer the holders both with and without inserts.
Newport Mint:	Collection of medals with great artistic quality and fine reproduction of detail. We offer the line in two sizes as well as in the form of key tags. The number one choice in a quality/price relation.
Spinner:	Pin, key tag or medal composed of two parts and one of them girates freely within the other.
Slider:	Pin, key tag or medal composed of two parts and one of them slides with respect to the other.
PVC:	Flexible and innocuos material that allows the incorporation of a lot of detail and color to the product We utilize it to make key tags, magnets, coasters, luggage tags and bag tags.
Diamond Cut:	Carving with a diamond the surface of the border of coins and medals that results in a brilliant shine.
Plaque mounts:	Metal emblem of great size and weight that is used to reproduce the logo of official or military departments, governments or corporations. They are generally mounted on wooden plaques and are placed on the wall.
Wine charms:	They are made in different colors and are placed on the stem of wine glasses in parties or reunions to identify to whom each glass belongs.
Golf Kits:	Packs of goodies that are distributed to the participants in a golf tournament, the cost of which is usually included with the tournament entry fee.
Money Clip:	Metal clip with an emblem attached that is used to carry paper money or credit cards while you play golf. Money clips of distinguished Country Clubs are often treasured by collectors.
Pitchfork:	Golf tool shaped like a fork that is used by the golfer to repair the mark left by the ball on the green when it drops from a great altitude. They are also called divot repair tools.
Bag Tag:	Emblem of the logo of a golf club that members hang from their golf bag to certify that the player belongs to the club. It is also a sought after product by collectors.

Production Methods

Emblemmarket is the new company with decades of experience.

During the past 40 years we have designed, fabricated and supplied the industry in various countries a wide variety of metal products of great quality at economical prices. In many countries, we are considered the main reference in the field of metal emblematic products. In the following paragraphs, we present to you the methods of production that we use to manufacture the diverse metal product line we show in this catalog.

Die Casting: We begin with the construction of the female cavity of a steel mold of the product we intend to cast. Until a few years ago, this process was handled mainly by hand with milling and engraving machines, starting from a clay or brass model. Nowadays, technology allows us to design our 3D models by using CAD software and afterwards reproducing them in steel with CNC machines. Once the mold is finished, we place it in an automatic die casting machine that injects the molten metal into the cavity of the mold, chills the part to a solid state, opens the mold, ejects the part and begins the next cycle by closing the mold again. These machines give us the capability to produce thousands of parts per day, lowering the costs of production substantially. The now cool metal parts are run through sanding and polishing machines to remove all rough edges and to leave the surfaces smooth in order to proceed to the plating process. These baths and the subsequent hand polishing, allow us to apply the antique, bright or matte finishes that are shown in our catalog. After plating and polishing if required, the parts move to the enamelling department, where, with automatic equipment, we proceed to inject the various colors required by the customer. After drying the enamelled parts in the oven, the products are packaged and prepared for shipment.

Die striking (stamping): We begin the process with the construction of a die that we make in the CNC machines we described before. We place the finished die in a hydraulic press that exerts tons of pressure on the metal against the die until it leaves an inverted and perfectly detailed image on the metal piece (brass, bronze, silver, etc.) When the metal is compressed, an overflow of material is left in the exterior of the product (medal, key tag, pin, etc). This excess metal is eliminated with a cutting tool, leaving the border of the item trimmed and clean. The border, as well as the front and back sides of the piece, are smoothed by hand with a polishing machine. After plating the piece as described before, the product moves on to the enamelling process, which we proceed to describe below in more detail.

Enamelling: There are two main materials used in enamelling, paint enamel and epoxy resin. The end result of both is similar regarding the color spectrum that can be achieved, but there is one important difference between them. Paint enamel is a pigment that adds color to the bottom and the walls of a cavity. When you stroke the surface of the finished piece with your finger, you can feel the relief of the cavities. On the other hand, epoxy resin fills the cavities. Once in a solid state, the relief of the cavities is not as noticeable to the touch, thus emulating the fired enamels of old. Epoxy resin does have an important advantage: it allows us to add the Glitter effect to the product. Glitter enamel is composed of small metallic particles that are placed by hand with tweezers on the surface of the resin when it is still in a liquid state. These particles float on the epoxy until it solidifies, at which point they become trapped permanently on the surface. The Glitter effect provides a unique, brilliant and colorful mirror effect that is only achievable with this method. Glitter is offered in a wide variety of colors which create reflections that attract the eyesight. It is virtually impossible to reproduce the beauty of this effect by way of the pictures in our catalog. Suffice it to say that the end result of the finished piece is always better than expected.

Following, we list the page numbers of the products that we use with our two main production processes.

Die Casting: 8, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 32, 33, 34, 35, 36, 37, 39, 40, 42, 44, 45, 46, 48, 49, 53, 54, 60, 65, 66, 67, 71, 72, 73, 74, 79.

Die Striking: 7, 8, 9, 10, 11, 29, 30, 31, 41, 43, 51, 52, 61, 62, 63, 64, 68, 73, 74.

If you have any doubts or questions or would like a more extensive explanation of the various production processes we use, please don't hesitate to ask us. If you prefer, come visit our showroom in order to see the products first hand. We are located in San Lorenzo de El Escorial, across the street from the Monastery.

Máquinas automáticas de esmaltado

General Information

- 1 - Prices:** The prices shown in this catalog do not include any applicable VAT.
- 2 - Molds and Screens:** they will remain in our possession for future use for a period of 3 years.
- 3 - Artwork and Design:** 50,00 euros for original designs and artwork. We will deduct the full amount of artwork and design costs upon completion and subsequent invoicing of the order.
- 4 - Freight:** 7,00 euros per shipment inside the Spanish peninsula. Freight is free on shipments above 95,00 euros per shipment, excluding VAT. Please see our website for shipment costs to UK or continental Europe.
- 5 - Custom Orders:** Custom orders will be manufactured only after receipt of the written purchase order. Artwork must also be approved in writing before proceeding with the order.
- 6 - Production Time for Custom Orders:** on many pages of our catalog, under Production Time, you will see the following:

Production time: 30 días ⇄⇄⇄ | ⇄⇄⇄ 80 días.

This indicates that the quantities to the left of the vertical line require a production time of 30 days and those to the right of the line, require a production time of 80 days. As you can see, the pricing to the right of the line drops very substantially. This is due to the fact that our factories are located in Asia and the quantities listed as 30 days travel by air and those listed as 80 days do so by ocean freight. Since most of our products are made of metal and are heavy, the weight affects the cost of air freight considerably. This means that if your order allows you the time to wait 80 days, you can obtain substantial savings in price of as much as 30%. If this is your case, please let us know on your order and we will adjust your prices accordingly.

- 7 - Minimum Order:** 25,00 euros per order excluding VAT.
- 8 - Minimum Quantities** - Each page in the catalog lists the minimum quantity for each product. If you wish to buy a quantity below the minimum, we may be able to comply on some products adding a less than minimum charge ranging between 50,00 and 200,00 euros. This depends on the product and the amount required. Please, consult with us if this is your case.
- 9 - Variations in the Value of the Euro:** because of the fluctuations in the value of currencies, we may adjust the pricing in our catalog up or down, without prior notice.
- 10 - Emblemmarket Member:** There is a one time initiation fee of 95,00 euros which includes the steel mold as well as 100 medallions (50mm) in a choice of two finishes: antique nickel or antique brass. The medallions include up to 4 colors of your choice. Once produced, we will stock the medallions in our warehouse in order to assemble them onto products chosen by you for future orders. As you use them up, we will replace them automatically so they will always be ready for your next order. See more information on page 3.

Once your medallions are ready, there are important advantages to being an Emblemmarket Member:

- You can buy without setup costs.
- You can buy any product without minimum quantities.
- You can combine products in any quantity and choice of finish.
- Your order ships in 48 hours.

Throughout the catalog we list the pages that contain Emblemmarket Member products and we show the symbol  next to each item that is part of the program, in order to make it easier for you to choose your gifts. In the future, we will gradually increase the number of products offered in the program, giving you more options and a larger selection of gifts to choose from for your clients, friends and family members.
